BALUSTRADING

Moulding the Future

PANORAMA ADMIRAL

LOW MAINTENANCE MODULAR BALUSTRADE SYSTEM

Our **balucrete** range consists of a spectrum of modular products, which, through unique design and assembly innovations, results in quick installation, reducing erection time on site, and minimizing disruptions to the work place.

Conforming to all industry norms and requirements for safety and loading, this system consists of 12mm thick tempered glass panes which are embedded in a 100mm deep furrow, either diamond cut or cast into the underlying concrete slab or concrete upstand.

The furrow is then back-filled with quick-set low-shrink construction grout with a neoprene edging applied before tiling, leaving a clean-cut finish and unobstructed views.

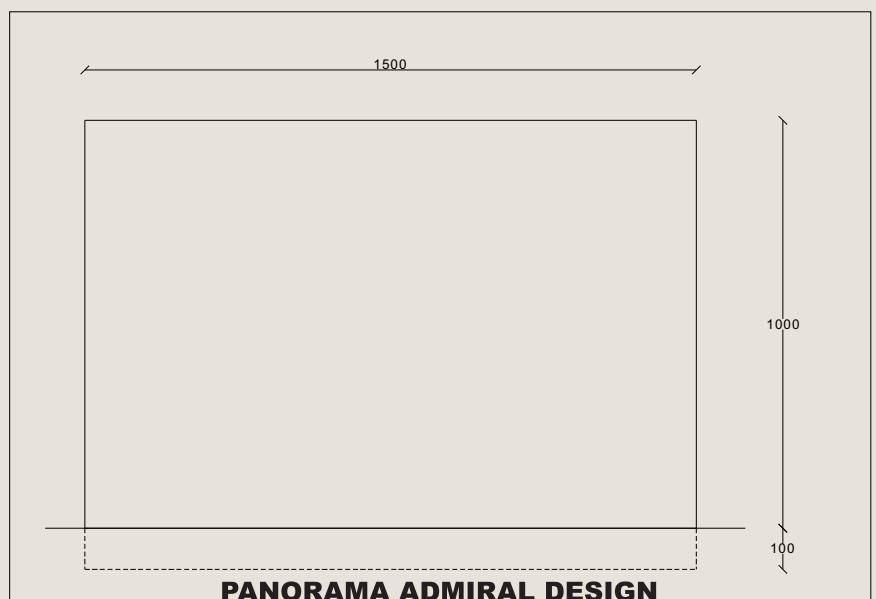

Panorama Admiral

An unobstructed frameless design offering the customer open vistas to enhance that feeling of unrestricted space

Technical Specifications

- . 12mm thick tempered safety glass
- . All edges beveled or rounded to customers choice
- . Glass embedded 100mm into a furrow cut or cast into the slab
- . Glass fixed in place using quick-set low-shrink grout
- . Top of furrow lined with neoprene strips
